Design Basics - Relative Measurement and Positioning

- Aditya Kumar
  Chief Technology Officer, edwisor.com

We will cover with the following concepts

1) Problem of horizontal scrolling

2) Relative measurements and positioning

Horizontal scrolling happens because of Multiple reasons

Horizontal Scrolling occurs when the elements overflow from their containers or they are positioned in a way which is going beyond the main screen. This can happen due to many reasons. Most common ones are -

- Absolute positioning

- Use of Floating elements

Refer to Css units section to understand how various measurements work

Let's have a quick look at how measurements work in css and understand how relative units add more control to our elements.

Refer to positioning section and layout section to understand relative positioning

Let's have a quick look at how positioning works in CSS and understand how relative positioning can come to our rescue.

Next Steps -

1) Media queries
